

Federation of Arab Engineers  
Environment Committee

Secretariat General

## Recommendations of the Conference of “Wastes in the Arab World: Reality and Solutions”

Held on Monday and Tuesday, October 29-30, 2018

In the Engineers' Syndicate – Tripoli

- 1) Enacting legislations to manage solid wastes along with the governing instructions thereof.
- 2) Emphasizing the processing hierarchy from dilution to sorting to recycling together with approving it in engineering works.
- 3) Managing the economics of wastes transport through reducing the transport distances and number by constructing collection and transport stations.
- 4) Motivating green construction and adopting the principle of “A polluter shall pay”.
- 5) Developing the construction laws so as to meet the wastes management requirements, and good design of their establishments in addition to improving their image via sustainable engineering.
- 6) Increasing the citizens' awareness of the importance of sorting and reducing wastes via the required awareness programs, along with paying the necessary attention to the media awareness of the solid wastes activity.
- 7) Disseminating the idea of the cleanest production in the industrial field.
- 8) Activating the principle of partnership between the public and private sectors in the field of solid wastes management.
- 9) Structuring the solid wastes management, and linking it to the local administration.
- 10) Adopting modern methods and selecting the most appropriate ones after conducting the environmental impact assessment study.
